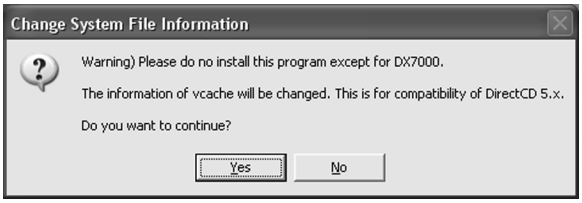
# DX7000 Driver Upgrade

This manual provides instructions for upgrading the driver file of the DX7000 software, version 1.2, so the DX7000 can be used with the external Teac CD-RW drive.

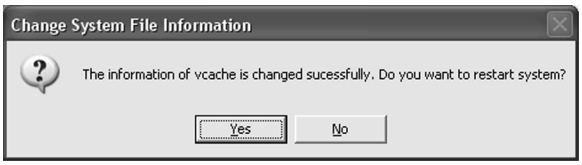
## INSTALLATION

1. On the DX7000, press the SETUP button on the right side of the main screen.
2. In the Setup screen, click the Quit to Explorer button (looks like a file folder) at the bottom of the screen.
3. Insert the floppy disk for the driver update into the A: drive of the DX7000.
4. Open the directory for the 3½ Floppy (A:) drive.
5. Double-click the SysVCache file. The Change System File Information dialog box appears.



Change System File Information
Warning) Please do no install this program except for DX7000.
The information of vcache will be changed. This is for compatibility of DirectCD 5.x.
Do you want to continue?
Yes
No

6. Click Yes to continue.



7. Click Yes to restart the system.
8. Reinstall the DirectCD™ 5.2 software. Follow the instructions in the DX7000CD Installation/Operation manual.

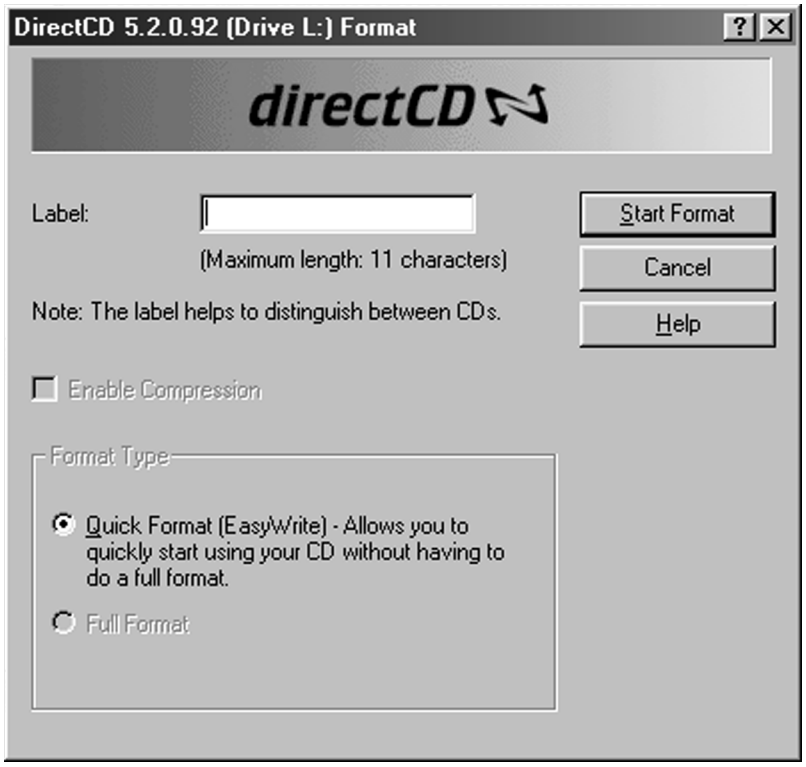
# OPERATION

Instructions for using the CD-RW drive are provided in the DX7000CD Installation/Operation manual. The following instructions provide supplemental information that is not included in the manual:

To reformat a preformatted disk:

1. Click the COPY button on the right side of the main screen. The following dialog box appears.



DirectCD 5.2.0.92 (Drive L:) Format
directCD
Label:
(Maximum length: 11 characters)
Note: The label helps to distinguish between CDs.
Start Format
Cancel
Help
Enable Compression
Format Type
Quick Format (EasyWrite) - Allows you to quickly start using your CD without having to do a full format.
Full Format

2. Click Start Format.

   **IMPORTANT:** You must click Start Format within 10 seconds after the dialog box appears to prevent the program from closing and the disk ejecting.

**REVISION HISTORY**
